## May Web Design, LLC

Donna May, Website Designer

Happy July! Summer is a great time to relax and reflect on your business or nonprofit. Make sure your website can change with your growing business or nonprofit organization.

I enjoy working with my clients to get to know them and their business or nonprofit so I can design the website they envision. During these last few months, I have enjoyed working on websites I created for clients and am planning new website design. I enjoy meeting small business owners and those that work with nonprofit organizations.

May Web Design, LLC creates professional websites that are affordable and enable clients to take ownership and update themselves. The most important part of my business is empowering website owners to update their website themselves, keeping it fresh and new.

# New Website Design

Always a cause for celebration!

I am honored when chosen to design a website for a client. I strive to give my clients the website they envision. We discuss in detail what they need and want in a website. I build their dream in a way that they can easily update and build on to keep the website fresh and new for their clients and members.

I have met some wonderful people who are starting their own business, have an existing thriving business, and people that organize nonprofits. I enjoy designing a website that they can take pride in and that will help in their current and future endeavors.

My business model is simple. I create the website my client envisions and give them the tools to update their website. There are no yearly fees paid to me for the website you own, only hosting and domain fees paid to Squarespace.

## New websites are always a cause for celebration

The purpose of the podcast is to encourage tree planting and proper tree care for our urban forest which includes neighborhoods, parks, and other open spaces. They cover the importance of already established trees and their benefits.

The show is hosted by Eva Monheim and Hal Rosner certified arborists through the International Society of Arboriculture.

# Two Week Website

Is it possible to create a professional website in 2 weeks?

Being able to devote two weeks to designing a website for a client is fantastic. I have officially been a website designer for over a year and can tell you that, yes, this is possible.

Once all information is received from the client a website build doesn't take more than a week. If I have all the information, I can build a website in one week and then make all necessary changes that the client would like the second week. A clear process outlined from the beginning will help move the design process along and make sure the client receives exactly what they want without waiting weeks or months. The timeframe is discussed in the initial consultation call.

Take a look at my blog to get more details:

## Imagine. Innovate. Invigorate.

Dream and Grow your vision for your business or nonprofit organization website.

Many websites are outdated or simply cannot be updated easily. New website design may be overwhelming. I can move your website into a platform that looks fresh and vibrant. If you don't have a website, we can start from scratch to build what you envision.

If you already have a Squarespace website, take a look at the Learning and Community section for websites, forums, guides, and videos. Great information.
